

SINCE 1984

Supreme Services

Flow Solutions, Pipeline Services & Water Filtration

Your Trusted Partner in Performance & Filtration — comprehensive fluid handling, pipeline and produced-water solutions for offshore and onshore operations.

Specialty Rental Equipment & Services • Oil & Gas Industry

OUR MISSION

Mission Statement

Supreme Services is a provider of Specialty Rental Equipment and Services to the Oil and Gas Industry. We ensure all our equipment is maintained to the highest industry standards and that our Service Technicians are trained and very competent in their job duties. With a large and diverse inventory of Oil and Gas Service Equipment, Supreme Services continuously strives to be the Customer's first choice Partner, by understanding our Customers' needs and requirements, while providing the Highest Level of Quality Equipment and Service. Our Continuous Goal is to assist our customers in eliminating wasted cost, increase productivity, in conjunction with meeting and exceeding customer requirements.

WHO WE ARE

Your Trusted Partner

Since 1984, Supreme Services has grown through decades of industry change by staying committed to what customers value most: reliability, innovation, safety, and performance.

Today we're the largest independent specialty rental company in our market. We don't just provide equipment — we deliver engineered solutions, backed by experienced professionals who consistently exceed expectations.

40+

Years of industry leadership

#1

Largest independent specialty rental

100%

Commitment to safety & performance

CORE CAPABILITIES

Our Services & Solutions

Fluid handling • Pipeline support • GAC water treatment • Engineering & project management

Flow Solutions & Fluid Handling

Comprehensive fluid handling and production support for offshore and onshore operations — safe, efficient fluid movement and treatment that minimizes downtime and environmental impact.

Well unload operations

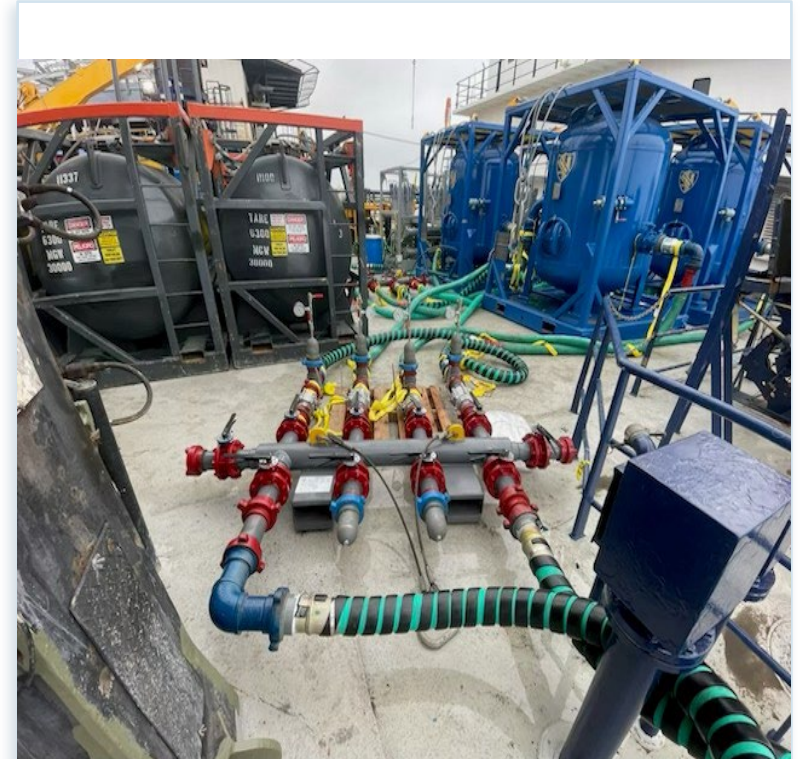

Acid stimulation flowback management

Produced water treatment equipment support

Line cleaning, flushing & pressure testing

High- and low-pressure fluid transfer

Umbilical flushing & commissioning support

Full-scope fluid handling and treatment — for offshore and onshore operations alike.

General Equipment Rentals

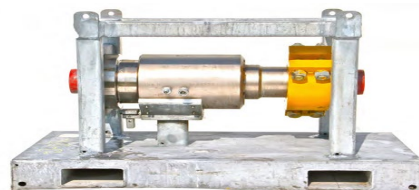

A broad inventory of rental iron, connections, and hose packages — maintained to the highest industry standards and ready for safe, efficient fluid transfer on any job.

Chicksan iron to 4"

Hydraulic quick disconnects

KLAW breakaway couplings

Low- and high-pressure hose reels

Rental-ready iron and hose packages — maintained to the highest standards.

PIPELINE

Commissioning to Decommissioning

PIPELINE SERVICES & SUPPORT

Offshore & Onshore Pipeline Support

Commissioning, maintenance, decommissioning, and abandonment — safely pressurizing, transferring, and treating pipeline contents while supporting NPDES compliance.

- Pigging, flushing & fluids handling for decommissioning
- Granular activated carbon vessels for water overboarding
- Low-pressure fluid capturing & transfer
- Nitrogen pumping
- High-flow & high-pressure fluid pumps
- Hydrostatic testing & dewatering
- Mechanical pigging
- Chemical pigging
- Thermal heating units
- Bolt torquing, flange & temporary launcher/receiver installs

Supports NPDES compliance and operator environmental objectives.

GAC Vessel Services

Granular Activated Carbon (GAC) systems remove hydrocarbons and other contaminants from water streams to meet regulatory discharge requirements and operational objectives.

- ✓ Hydrocarbon removal from completion & stimulation flowbacks for NPDES-compliant discharge
- ✓ LDHI, MEG & water-soluble organic removal from hydrate remediation
- ✓ Polishing of produced & treated water to cut residual oil before discharge
- ✓ Produced water treatment for offshore facilities and intervention projects
- ✓ Pipeline flushing for compliant water overboarding
- ✓ Service & support for customer-owned carbon systems

Reliable, environmentally compliant water management — supporting NPDES guidelines.

Leading the Way in Water Filtration

Our Filtration Division is the next evolution of Supreme's commitment to innovation — a new team pairing deep industry expertise with a fresh, forward-thinking approach to water treatment.

We specialize in advanced water filtration that improves efficiency, reduces environmental impact, and meets the toughest operational demands — from removing contaminants to optimizing water reuse and ensuring compliance.

We're not here to follow outdated methods — we're here to raise the bar with smarter, more effective solutions that help customers operate cleaner, safer, and more efficiently.

"Raising the bar in water filtration."

IN-HOUSE EXPERTISE

Equipment Design and Engineering

From concept and compliance documentation through fabrication-ready design — engineered to keep your operations safe and productive.

- 3D Modeling
- Fabrication Drawings
- Equipment Function analysis
- Engineering Review (PE Stamping)
- Operational procedures

Upscale Utility Fleet for Dependable Transportation

Supreme Offshore Services, Inc. maintains four offshore supply vessels — among the newest running in the Gulf, with the most prestigious amenities and the capability to service up to 200 miles offshore.

Drilling & P&A Support

Oceanographic Survey & Diving Support

Stand-by Vessels

Construction & Decommissioning

Production Support – Methanol Pumping

Spot Hire & Hot Shot Vessels

Four of the Gulf's newest vessels — equipped for any offshore mission.

Built for Dependable Offshore Performance

Supreme Offshore OSVs combine accommodation, safety, and cargo capability — certified and equipped to support offshore facilities and personnel across the Gulf of Mexico.

- ✓ Separate crew & service quarters, plus dedicated management accommodations
- ✓ USCG-certified “stand-by” status — evacuates up to 50 personnel from the Gulf
- ✓ High-pressure, high-volume fire monitors to support offshore platforms
- ✓ 3,000 sq ft of deck space for 350 long tons of ABS load-certified cargo
- ✓ Specialized methanol & fuel transport for offshore facilities
- ✓ All vessels equipped with Dynamic Positioning (DP1)

USCG and ABS load certified — built for dependable offshore performance.

EXPERIENCED & CERTIFIED TEAM

Qualified Personnel

- Well control training for safe, compliant operations
- OQ-certified technicians across covered tasks
- Decades of combined oil and gas field experience
- In-house training matrix tracking every qualification
- ISNetworld compliant for streamlined contractor management

TEAM

**Trained.
Certified.
Experienced.**

Quality Management System

1 Deliver products and services that meet or exceed customer requirements

2 Drive continual improvement of processes, conformity, and satisfaction

3 Commitment understood, implemented, and maintained at every level

4 Reinforced through orientations, facility postings, and supplier engagement

5 Quality Assurance Manager leads; all staff and suppliers share responsibility

6 Focus on defect prevention, early detection, and corrective action

7 Reviewed regularly for continued suitability — keeping the system effective as the business evolves.

HSE

**Safety as a
Condition of
Employment**

MANAGING THE HSE PROGRAM

Health, Safety & Environment

- Plan safety into every job by identifying risks and hazards up front
- Treat safety as a condition of employment and a shared responsibility
- Invest in people through training, involvement, and engagement
- Maintain clear safety rules, continually updated from lessons learned
- Ensure proper supervisor instruction — jobs done right the first time
- Use a Job Safety Analysis (JSA) for new, unusual, or critical work
- Hold regular group safety meetings to inform and motivate the workforce
- Prevent failures through inspections and preventative maintenance
- Investigate every accident to learn, establish controls, and share findings

Why Choose Supreme

Proven Experience

Over four decades of industry leadership

Innovative Equipment

Patented, continuously improving technology

Filtration Expertise

Advanced water solutions tailored to you

Customer-First

We don't just meet expectations — we exceed them

Built on Values. Driven by Results.

We invest in our employees, support our communities, and prioritize health, safety, and environmental responsibility. Through programs like our SQIP (Safety Quality Incentive Program), we continuously improve operational efficiency while maintaining the highest safety standards.

PARTNER WITH SUPREME

When you choose Supreme, you choose a partner in your success.

From specialty rental to cutting-edge water filtration, we bring the expertise, equipment, and commitment to keep your operations running at peak performance.

Performance You Can Trust. Filtration You Can Depend On.
